Product Search API returns all products when searching with only special characters #1073

[Open](#)[Bug](#)[Assignees](#)[Labels](#)[bug](#)**qaakib02falaqdigital** opened 1m ago

Description

When a product search is performed using only special characters such as @#\$%^&*, the API returns the product list instead of returning an empty result.

Steps to Reproduce

- Open Postman.
- Send a GET request to the Product Search API.
- Enter only special characters in the search parameter, for example: @#\$%^&*
- Send the request.
- Check the response.

Expected Result

The API should return 200 OK with an empty items array because no product matches the special-character search.

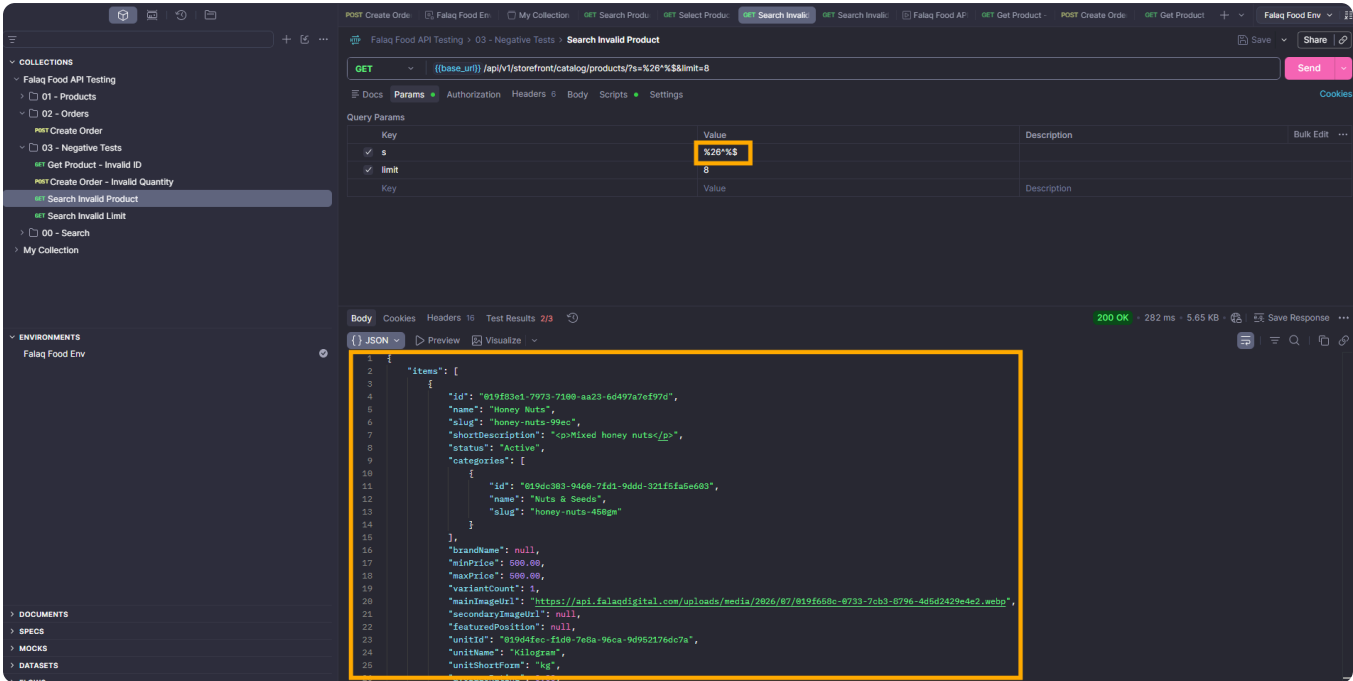

```
{
  "items": [],
  "totalCount": 0
}
```

Actual Result

The API returns 200 OK, but it returns multiple products.

```
{
  "items": [
    {
      "name": "Honey Nuts"
    },
    {
      "name": "Coca cola"
    }
  ],
  "totalCount": 54
}
```
