

Test Summary Report

Project Information

Item	Details
Project Name	Falaq Food Storefront - End-to-End Purchase Flow Testing
Website	https://shop.falaqdigital.com/
Testing Type	Manual Testing (UAT)
Test Cycle	Cycle 1
Tester	Akib Rahman
Test Duration	20 July 2026 – 22 July 2026
Environment	Windows 11 Pro, Google Chrome v150

1. Objective

The objective of this testing cycle was to verify the core functionalities of the e-commerce website, identify defects, and ensure users do not face any issues for ordering products before release.

2. Scope of Testing

The following modules were tested:

- User Registration
- User Login
- Product Search
- Product Filters
- Product Details
- Shopping Cart
- Checkout
- Payment
- Order Confirmation
- Order History
- User Profile
- Logout

3. Test Execution Summary

Metric	Count
Total Test Cases	20
Executed	20
Passed	15
Failed	5
Blocked	0
Not Executed	0
Pass Rate	75%

4. Defect Summary

Severity	Count
Critical	0
High	2
Medium	0
Low	3
Total	5

5. Bugs

Bug ID	Description	Severity	Status
BUG-001	Stock Out products are available to order	High	Assigned
BUG-002	Sorting options are not working properly	Low	Assigned
BUG-003	Categories options are not working perfectly	Lowest	Assigned
BUG-004	Thumbnail products are not redirecting to their respective pages	Low	Assigned
BUG-005	Checkout page accepting invalid inputs	High	Assigned

6. Features Successfully Tested

- User registration
 - User login and logout
 - Product search
 - Category filtering
 - Product details page
 - Add to cart
 - Update cart quantity
 - Remove item from cart
 - Order history
 - User profile management
-

7. Features with Issues

- Checkout fields
- Sorting & Categories menu
- Thumbnail
- Stock out products

8. Risks

- Users may be able to complete purchases with invalid name.
 - Users may face difficulties in sorting, categorizing products.
 - Users may complete purchase of a stocked out product.
-

9. Recommendations

- Resolve all Critical and High severity defects before production release.
 - Perform regression testing after bug fixes.
 - Conduct cross-browser testing on Chrome, Firefox, Edge, and Safari.
 - Execute end-to-end testing for the complete purchase flow.
 - Perform performance testing during peak traffic conditions.
-

10. Conclusion

A total of **20** test cases were executed, with **15** passing and **5** either failing or blocked. Core functionalities such as registration, login, product browsing, and cart management are working as expected. However, the checkout and product status modules contain critical defects that prevent successful order completion. The application is **not recommended for production release** until these issues are resolved and regression testing is successfully completed.
